

Commencement of Tender Process for Saare-Liivi Offshore Wind Park Geotechnical Works

Utilitas Wind OÜ is pleased to announce the commencement of open tender process for geotechnical works for Saare-Liivi Offshore Wind Park. As part of our commitment to fostering transparency and competition, we invite all interested parties to participate in this tender.

The survey is planned to be carried out in Saare-Liivi Offshore Wind Park area in where about 8-12 deep boreholes and about 25 cone penetration tests will be made. The maximum water depth in the survey area is about 30 m.

Detailed information about the project, as well as instructions for a Tenderer will be provided in the Invitation of Tender (ITT) package which will be provided after signing the Non-Disclosure Agreement with Utilitas Wind OÜ.

The scope of this Invitation to Tender (ITT) includes:

- WP A: Geophysical clearance survey
- WP B: Deep geotechnical investigations
- WP C: Laboratory testing

The key dates for the work are:

- Earliest commencement date in field: 01 April 2025
- Completion date of field work: 30 September 2025
- Completion of data delivery: 31 December 2025

The Offer submission deadline is 31 December 2024. Contract award is currently expected 28 February 2025, pending negotiations.

We kindly request all interested parties to contact Utilitas Wind OÜ at the earliest convenience for signing the NDA for receiving detailed ITT package.
